

## TRAVEL VACCINATION PACK TEIGN ESTUARY MEDICAL GROUP

Thank you for your enquiry regarding travel vaccinations.

Please read, complete and bring this pack with you for your appointment as we will need this information to determine which vaccinations you require.

Please allow plenty of time to arrange your vaccinations. Some vaccinations need to be given 3 months in advance of travel.

In common with other local practices we are no longer able to supply all travel vaccines on the NHS, and consequently there may be a charge for some of your vaccinations. During your consultation, we may use an approved web site for travel immunisation advice. Should you require a print of this a small charge will be made.

Please make a 30 minute appointment with the practice nurse for advice on travel vaccinations. You will be advised at that first consultation of any costs involved.

Some vaccines may need to be ordered in specifically for you. If there is a charge for these particular vaccines they will be ordered for you upon receipt of your payment.

You may wish to access these websites for information regarding your travel:
